Quick Installation Guide

If you have any problems with this product please contact our technical support team before returning it to the store.

Universal USB Docking Station USB 3.0 Mini Dock

English

- Thank you for purchasing the j5create USB Docking Station! USB Docking Stations are high-speed, professional-grade docking stations designed to extend your computer’s functionality and provide enhanced performance. This user guide will help you set up and use your mini docking station.

- For best performance, use a USB 3.0 port. Your computer will need to recognize the station and be able to communicate with it. Please check that your computer supports USB 3.0 before proceeding.

- Before using the docking station, connect the power adapter to your computer and ensure it is turned on.
