Which type of cable and connection is most commonly used today to fast-charge modern smartphones and laptops?

- A. USB Type-C (USB-C)
- B. VGA Cable
- C. Ethernet Cable

2
●
●
●

If your laptop only has one USB port, how can you plug in a mouse, a keyboard, and a flash drive at the same time?

- A. By using a USB hub to split the single port into multiple openings.
- B. By stacking the plugs physically on top of each other.
- C. By wrapping the cables tightly together with tape.

3
●
●
●

Why does your phone charge really fast at first, but slows down after it hits 80%?

- A. To let the phone rest so it can download text messages.
- B. Because the wall outlet is running out of electricity.
- C. To keep the battery safe from getting too hot.

4
●
●
●

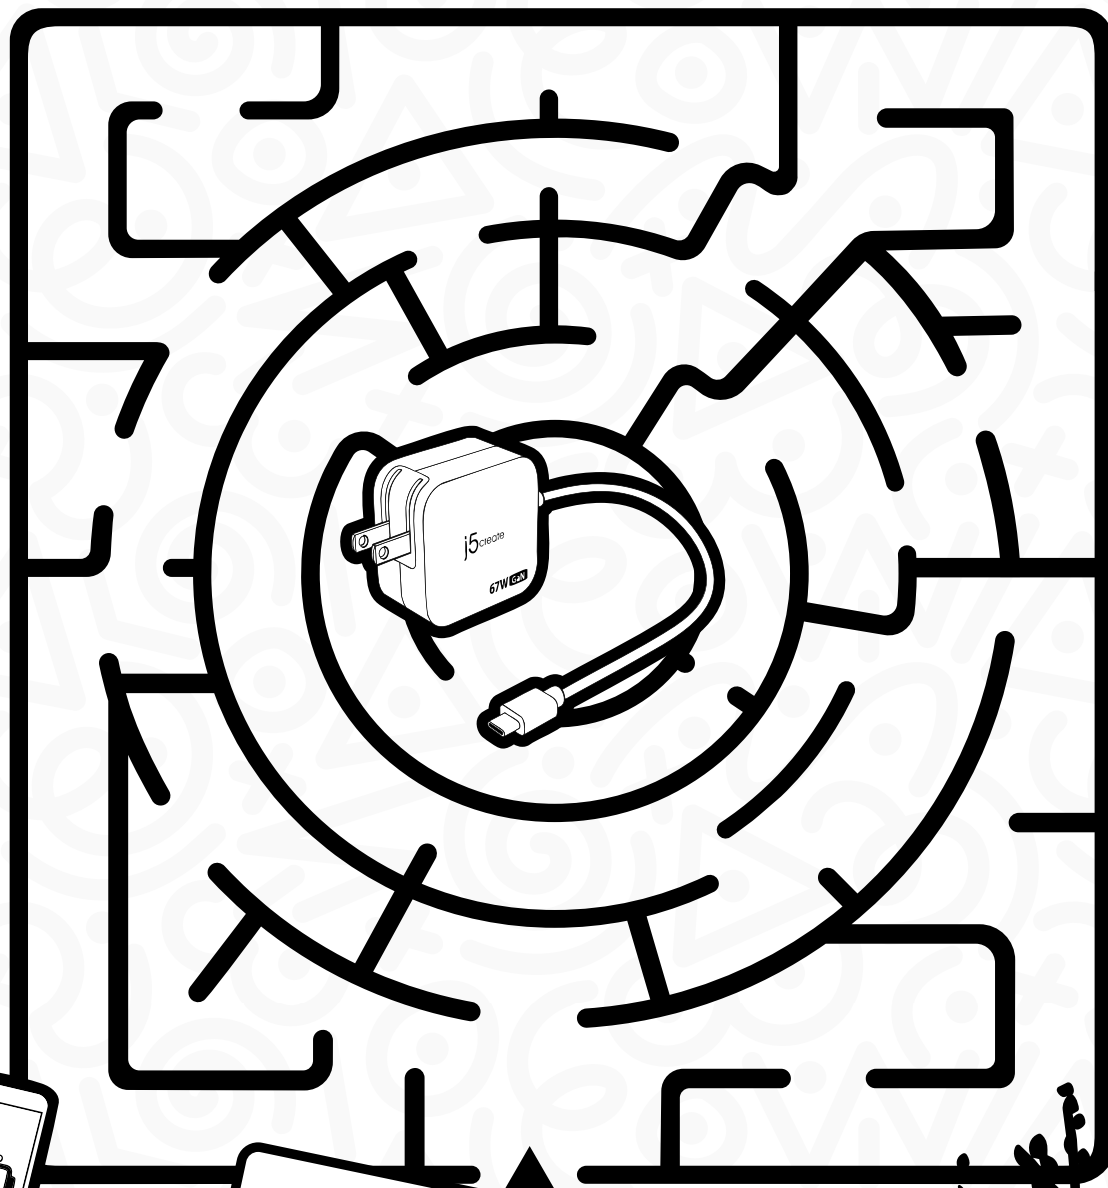

What is the main difference between Wi-Fi and the Internet?

- A. Wi-Fi connects to a router without wires, Internet connects router to the world.
- B. Wi-Fi is only for video games, and the internet is only for schoolwork.
- C. They are the exact same thing.

5
